

Date: January 12, 2021

FM Global Safety Solutions is proud to announce that on December 10, 2021, our Mobile Strongroom received certification 21-497 in accordance with EN 1143-1:2019 Grade 3 standards. This certification underscores our commitment to providing top-tier security solutions for our clients.

Construction & Materials:

Our Mobile Strongroom Grade 3 is crafted with precision using high-quality materials. Featuring a patented panel of various reinforcement materials, the body and door are engineered to withstand attacks from a variety of tools and techniques employed by burglars.

Locking Mechanisms:

Equipped with a certified high-security vault lock, our Mobile Strongroom Grade 3 boasts a combination of multi-locking mechanisms. These advanced features ensure maximum protection against unauthorized access.

Certification & Testing:

Our Mobile Strongroom Grade 3 undergo rigorous testing conducted by RISE - Research Institutes of Sweden to ensure compliance with the required standards. Certification 21-497 is issued by SBSC, further validating the quality and reliability of our product.

Weight & Size:

Despite its robust security features, the Mobile Strongroom maintains a manageable weight and size. With a 360° reinforced shield, it offers maximum security without compromising on space or transportability.

Applications:

Ideal for high-security environments, including government facilities, military installations, transportation, construction sites, and more, our Mobile Strongroom Grade 3 vault provides unparalleled protection for valuable assets. Whether for storage or transportation, our safes offer peace of mind and convenience.

Conclusion:

FM Global Safety Solutions is dedicated to delivering anti-theft storage solutions that meet the highest standards of security and reliability. Our Mobile Strongroom Grade 3 vaults are designed to safeguard your assets during transit and storage, while also meeting international freight standards for ocean, road, and rail transport.
